

Did you know?

Save energy with barrel insulating blankets

Using standards found on our latest platform, this upgrade provides Engineering and parts to add insulation blankets to cover the feeding section of the extruder heat zones. The insulation blankets are specifically designed for Husky machines.

Benefits:

- Traps heat
- Reduces radiated heat losses to the molding room
- Conserves energy
- Ensure stable / consistent process

Payback in less than 1 year*:
1% Avg. Saving

Includes:

- Parts
- Engineering
- Documentation

Applicable machines**:

G-PET, HyPET & HyPET HPP

* Depending on the energy cost, machine size and application

** In case of special application contact your Husky Business manager to review the applicability of the solution.
